

Please read carefully

India

Microchip is not required for entry into India. However the 15 digit ISO microchip is always recommended for International Pet Travel. See additional information on reverse side.

No Objection Certificate Required – See Below

VETERINARIAN EXAMINATION

Please note that all pets entering into India must be issued a NO OBJECTION CERTIFICATE from the ANIMAL QUARANTINE STATION in India whether accompanied or manifest, prior to landing into India .

- The NOC from the Animal Quarantine Station in India **must be obtained by your local clearing agent in India. It is required to be obtained in person and cannot be applied for online.**
- The NOC is sent to the Shipper by fax or a scanned copy by email . The original must be presented to the Airline in India at the port of entry of the pet before the pet has been loaded in the other country.
- If the pet is coming accompanied, the owner of the pet must carry the NOC copy with him at all times. If the pet is coming as manifest cargo , the NOC copy must be attached on the crate in a transparent pouch to protect it from damage .
- There is not fixed fee schedule for this document at the present time but your agent in India will provide you that information.
- This document takes about 5 working days to obtain . Documents required prior to obtaining this document are (to be sent in copy to India)

1. All vaccination records of the pet
 2. Government issued veterinary certificate from the exporting country (USDA document with the Annexure I in case of USA)
 3. Flight details / confirmation of the passenger's travel into India / Copy of the airway bill
- Updated info from Rishya Hemchandra, Yashbans

BAN ON CERTAIN ANIMALS COMING INTO INDIA.

- Pets/Animals are NOT allowed into Bangalore, Hyderabad or Pune. Only dogs and cats are allowed into Delhi and Mumbai. Dogs, cats and certain birds are allowed into Kolkata.
- The Ministry of Agriculture and Science is releasing a list of pets and animals allowed into India shortly, As of now we have been advised by the Airport , Customs and Clearing Authorities to check with the Ministry and obtain written proof (in the form of Import Permit or Bill Of Entry) if other kinds of animals (ie Mice, Hamsters, Birds, Fish) are permitted to enter at that time pertaining to that consignment in particular .

DEFINITION OF PETS VERSUS NON-PETS.

1. Only Dogs and Cats are considered "pets" ... Rabbits , fish, hamsters, mice, birds and the rest of the animal

kingdom are not considered pets.

2. Cats and dogs do not come under the “commercial” animal category.

3. Other kinds of animals which we don't consider under the category of 'pets' might be allowed into the country under special circumstances; lots of documentation and of course tons of other formalities :) This document takes about 5 working days to obtain .

Documents required prior to obtaining this document are

1. All vaccination records of the pet
2. Government issued veterinary certificate from the exporting country (USDA document with the Annexure I in case the pets are traveling from the USA)
3. Flight details / confirmation of the passenger's travel into India / Copy of the airway bill

These documents must be submitted to your agent in India who will obtain the No Objection Certificate on your behalf.

We recommend you use this company as your agent in India:

Rishya Hemchandra

Yashbans and Fuzzy Wuzzy

Bangalore, India

Cell:+91 984 515 8080

Direct line: +91 988 631 2691

Fax: +91 80 4163 8533

She is a local pet transport agent who can advise and assist you.

The pet must be vaccinated for rabies at least 30 days prior to travel to India. Rabies vaccination is not required for pets entering from a rabies free country. The US, Canada and EU Countries are **NOT** a rabies free country.

The veterinarian should complete the sanitary certificate providing all of the information requested as close to the travel date as possible but not more than 14 days prior to the date you enter India.

VETERINARIAN MUST COMPLETE IN BLOCK LETTERS

AIRLINES: The airline may also require a health certificate signed within **10 DAYS** of travel. This certificate does **NOT** need to be USDA certified.

RETURN TO THE UNITED STATES

In most cases these same certificates may be used for your return to the Country of Origin provided the vaccinations have not expired. When returning, be certain that your pet is free of parasites.

APHIS FORM 7001/International Health Certificate

This is a multi-part health certificate that can be provided only by your veterinarian.

RECOMMENDED PROCEDURE

Have your vet complete the Aphis Form 7001 and send **ONLY** the APHIS form to the *USDA/APHIS/VS Area Office* veterinarian with a check for \$48.00 and a postage paid return envelope.

RECOMMENDED PROCEDURE

AFTER the APHIS form is returned to you then attach the India Sanitary Certificate and attach the pet's inoculation record.

INOCULATION RECORD

This is a record of the vaccinations given your pet including the name of the vaccine, manufacturer of the vaccine, batch number, date administered to the pet and expiration date of the vaccine if applicable.

NO OBJECTION CERTIFICATE

Then forward with the documents listed above to the agent in India who will acquire the certificate for you.

PET PASSPORT

The certified copy of the APHIS form, the India Sanitary Certificate, the pet's inoculation record and the no objection certificate create your pet passport for India which is valid for up to four months travel within India.

Chennai – 601 302.

PET MICROCHIPS

All European Union Member Countries and many of the other countries of the world require a microchip must first be implanted in the animal to identify it. The ISO (International Standards Organization) requires that the microchip meet specifications 11784/11785. This is a 15 digit non-encrypted microchip operating at 134.2 kHz. This is the microchip for which veterinarians and animal shelters in Europe are most likely to have compatible readers. If the microchip does not conform to either of these ISO Standards, it may not be able to be read by a standard microchip reader when the animal is checked at the time of travel to the UK or to a European PETS (EU) country. It further means that if your pet is lost while in another country, the animal shelter or veterinarian who finds the pet may not be able to access the database and arrange for the pet's return to its owner. If your pet has a different microchip we recommend you carry your own scanner.

To the best of our ability, we ensure that recommendations given on www.PetTravel.com reflect the current regulations. We cannot predict how a given Country may enforce these regulations. Noncompliance may result in the need to make arrangements to put the pet into quarantine upon arrival in the EU, or return the pet to the country of origin. We suggest that you minimize the disruptions that may occur by following the rules of the country you are visiting.

ISO microchip and microchip scanners are available at www.pettravelstore.com
